Record Type: New Consultation

Came in following a referral from his GP. He mentioned he often misses family members calling from another room and finds it hard to keep up in noisy places like restaurants. We ran a pure-tone audiogram today and the results showed mild to moderate high-frequency hearing loss in both ears. Went through the audiogram with him and talked through what it means day to day. He seemed keen to try hearing aids so we have booked him in for a demo next week.
