

Hearing Aid Consultation

Consultation Date: 03-06-2026

Doctor: Sarah Pemberton

Audiologist: Daisy Song

Chart No.: P1-006

Patient Name: David Coleman

Ear Side: Right

Demo Model: ReSound OMNIA 9

Record Type: Fitting Completed

David came in for a fitting for his right ear only. Fitted a ReSound OMNIA 9 RIC to the right ear and programmed it to his current audiogram. He has worn aids before so he settled in quickly and knew what to expect. We talked through the main differences between his old device and the OMNIA 9, particularly the Bluetooth streaming and the updated noise management. He was happy with how everything sounded during the appointment and had no concerns. Booked him in for a review in six weeks.
